

THE SAFETY COURSE FOR INDUSTRY CONTRACTORS

SSG ENTRE BASIC COURSE SWEDEN is Sweden's most popular safety course for industry contractors. Around 250 000 contractors have completed this basic safety course to date, all with a view to reducing work-related accidents in industry.

This course is web-based and provides industry contractors with a good starting point for a safer work environment. It includes five sections relating to preventive work environment management, permits, requirements, environmental work and what to do in an emergency, and it ends with a certification test to verify that participants have assimilated the knowledge needed. To complete the course, you log in to the ssg website using a course code – all you need is a computer and an Internet connection. It takes two to three hours to complete the course.

When you have passed the course, the results are recorded in ssg:s system and can then be accessed using your Access card. Your Access card is valid at all plants requiring SSG ENTRE BASIC COURSE SWEDEN. Please see ssg.se for a complete list of industries requiring SSG ENTRE.

EFFICIENT AND COST-EFFECTIVE

Reviewing safety procedures on site may be both costly and inefficient. With ssg entre basic course sweden, contractors are already prepared when they arrive and can start working straight away. This saves both time and money without having to compromise on safety.

ADVANTAGES OF E-LEARNING

E-learning offers many advantages. The flexibility of the training allows course participants themselves to decide where and when they learn. They also have the option of going back through the course and repeating various sections, thereby facilitating the learning process. ssg entre basic course sweden also ensures that everyone who has completed the entire course has studied exactly the same content.

LOCAL COURSES

Plants also have the option of supplementing SSG ENTRE BASIC COURSE SWEDEN with local, more specific information in a separate local course. This customises the course package to meet the needs of each individual plant.

LANGUAGES

SSG ENTRE BASIC COURSE SWEDEN is currently available in Swedish, English, Finnish, German, Polish, Italian, Norwegian, Czech and Danish.
